A Fully Integrated Mobile Charge Capture Solution

MD Coder helps provide quality healthcare that patients deserve by leading the way with intuitive handheld electronic charge capture products. We pride ourselves on providing innovative charge capture solutions, strategic partnerships for optimized interfacing, and quality customer service.

MD Coder improves the entire charge capture process from patient list management to charge recording, enabling a higher level of accuracy and eliminating lost charges.

Our Services

- **Mobile Charge Capture**
- **Patient Management**
- **Secure Messaging & Telemedicine**
- **EMR & Billing Technology Integration**
- **Real time reporting & notifications**

MDTech

CORONIS
HEALTH

Managing patients, notes, and charges shouldn't be a difficult process. However, we have found that without a charge capture solution, practice growth and efficiency can be limited. Physicians are losing time and money with paper rounding lists, manual note transfer between systems, and more.

Current revenue cycle situation

- Paper process or homegrown solution
- Billing lag can be from weeks to months
- Limited visibility into missed/incorrectly billed charges
- Difficulty getting demographics from the hospitals
- Up to 9 hours at a time to fill out facesheets & charges
- Inefficient follow-ups and handoffs

Opportunities to Leverage MD Coder

- Speed and efficiency are key. Our offering improves both for providers, billers and admins.

- Our partners see lag go down to a day or two as the charges will hit the billing system automatically.

- Cloning similar charges as the providers round will save significant time.

- Interfaces with the hospital for live demographics.

- Advanced analytics on provider / location productivity + alerts for missing charges.

- Built in follow-up and communication channels for patient sharing.

How Can We Help?
